

Press Release

Second phase of major project has started

April 12, 2019 - EFG Scandinavia has started the second phase of a major construction project in the North of Sweden. The experts for crane logistics solution will together with partners erect 119 wind turbines in one the world largest wind parks. Together with the generators built in Phase 1 last year, all in all 179 wind turbines with a capacity of 3.6 MW each will be producing energy for the Scandinavian market at the end of this year. „The project is a milestone for our company,“ says Managing Director Tom-Roar Solhaug. „We

are extremely please, that we have again been awarded the contract. This shows us, that our customer is satisfied with our performance in the first phase. Our success is the result of the close cooperation within EMS-Fehn-Group, especially with our sister company Europatrans in Lübeck, which provides first-class heavy haulage solutions in this demanding environment.“
