Present employment: Asia Sustainability Manager, BESTSELLER A/S

Motivation

Through talks with Mr. Bo Drewsen, I realise that the transportation industry may need a profile like mine in order to 1. take advantage of savings and business opportunities in CSR (Corporate Social Responsibility) and 2. prevent problems relating to CSR.

I have for almost 20 years been working in multiple industries in the interphase between business and sustainability. So if you see a common interest, I am more than willing to get in touch with you.

It may be time to move on to an international job in the transportation industry.

You will learn from my CV that I have lots of experience with management, international work, communication and presentation and not least handling of a great variation of stakeholders.
