

A New Generation of High Security
Locking Solutions for Shipping
Containers and Closed Body Trucks

Powered By iLOQ - NFC Keyless Technology

www.seguratainer.com

A global company established in Johannesburg, South Africa, and now headquartered in Singapore.

Seguratainer designs, manufactures and delivers high security cargo protection solutions.

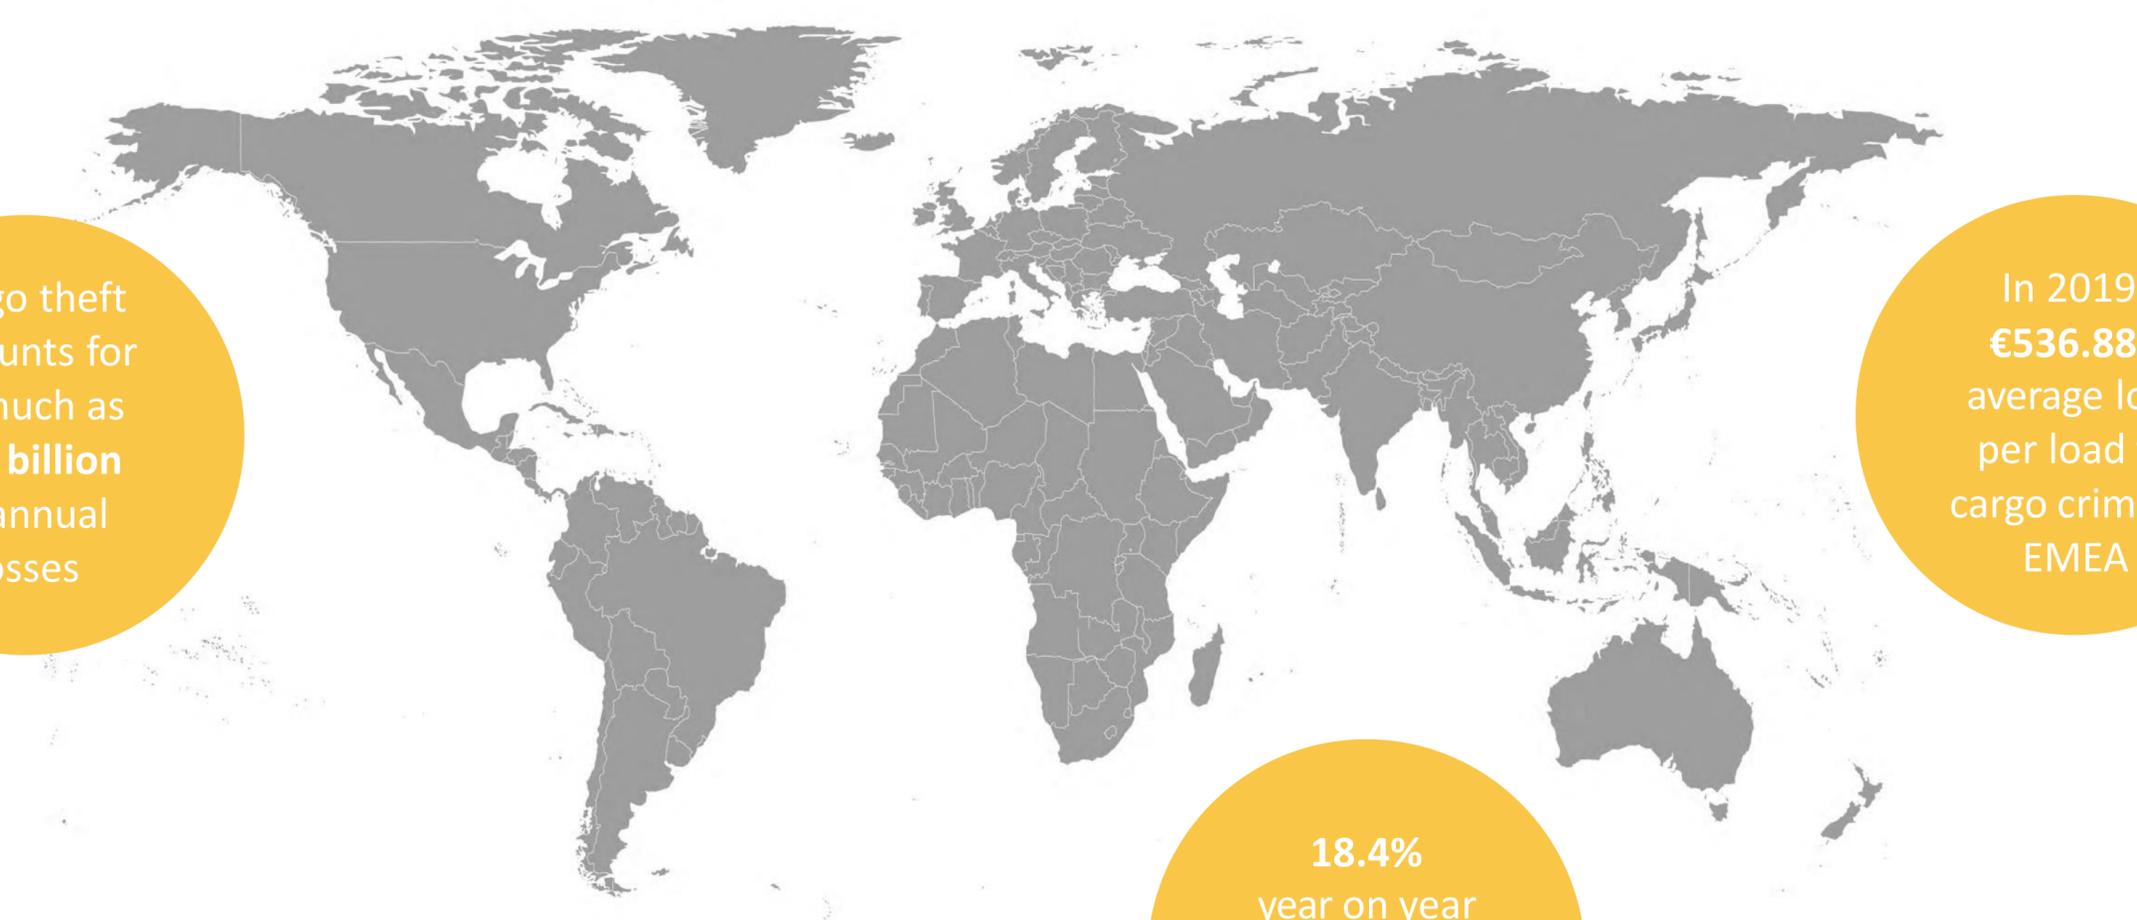

Seguratainer locks are powered by iLOQ: a Finnish fast growing company dedicated to self-powered digital locking and access management solutions.

30 years experience increasing the safety and transparency within the storage and logistic sectors

THE ECONOMIC DAMAGE OF CARGO THEFT

Cargo theft
accounts for
as much as
\$30 billion
in annual
losses

In 2019,
€536.889
average loss
per load to
cargo crime in
EMEA

18.4%
year on year
increase in
container
security

HOW TO PROTECT YOUR CARGO

From Container to High Security Vault

Patented locking systems uniquely engineered to safeguard cargo and high value goods.

Innovation

Groundbreaking security concepts with resilient designs to prevent tampering and theft.

High Resistance

Hardware that's tough, able to withstand external threats.

Eliminate Keys

Open and close locks using a mobile phone and access 24/7 audit trails.

NFC Technology

SEGUTARAINER locks are powered by iLOQ's Patented NFC technology: convenience and safety.

No Battery

No batteries, no hard wiring. Mechanical locking strength with an environmentally friendly solution.

KEEPING YOUR CARGO SAFE

EXTERNAL CLAW LOCK

External claw lock for containers, clamping the superior part of both doors over the keepers. The claw does not exceed the depth of the corner castings.

Patented locking mechanism clamping on four points

Keyless NFC technology powered by iLOQ

Highly resistant and heavy duty design

Designed for shipping containers and closed body trucks.

Optional: Electronic closing mechanism.

Optional: GPS tracking.

EXTERNAL MINI CLAW

This external mini claw is smaller and lighter. Clamping on the main door keeper, locking the container. Locks are made in left and right versions to fit all containers.

Smaller and lighter,
very easy to operate

Keyless NFC
technology powered
by iLOQ

Highly resistant and
heavy duty design

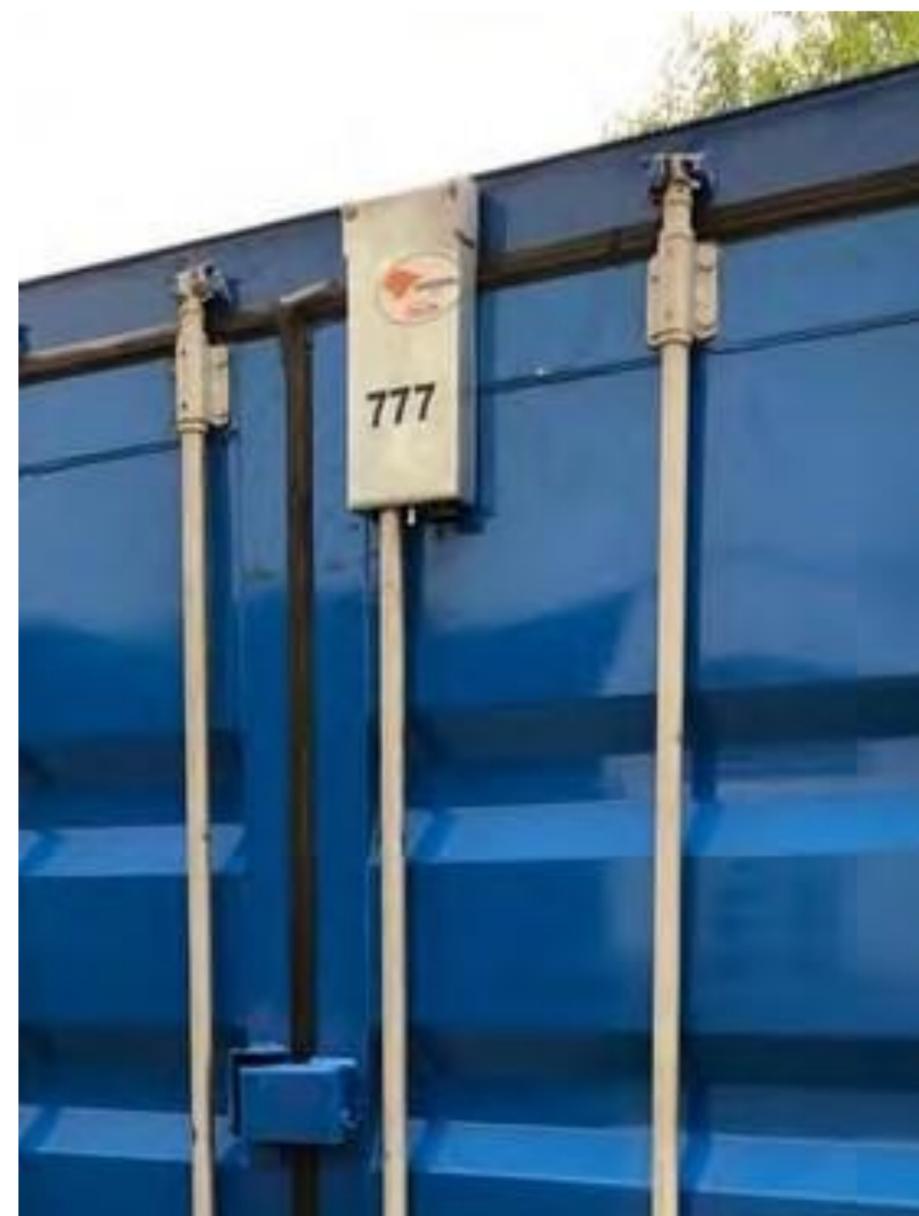

Can fit left and right,
top and bottom of the
doors.

Designed to fit all
containers, including
GREEN containers

Available version:
Slam lock;
Push lock key version

INTERNAL LOCKING SYSTEMS

Unique internal locking systems are mounted on the inside of the container or truck. Invisible from potential threats. Each internal locking system locks on more than 4 points.

Patented vault-like locking mechanisms

Keyless NFC technology powered by iLOQ

Heavy duty design and a permanent fixture to trucks or containers

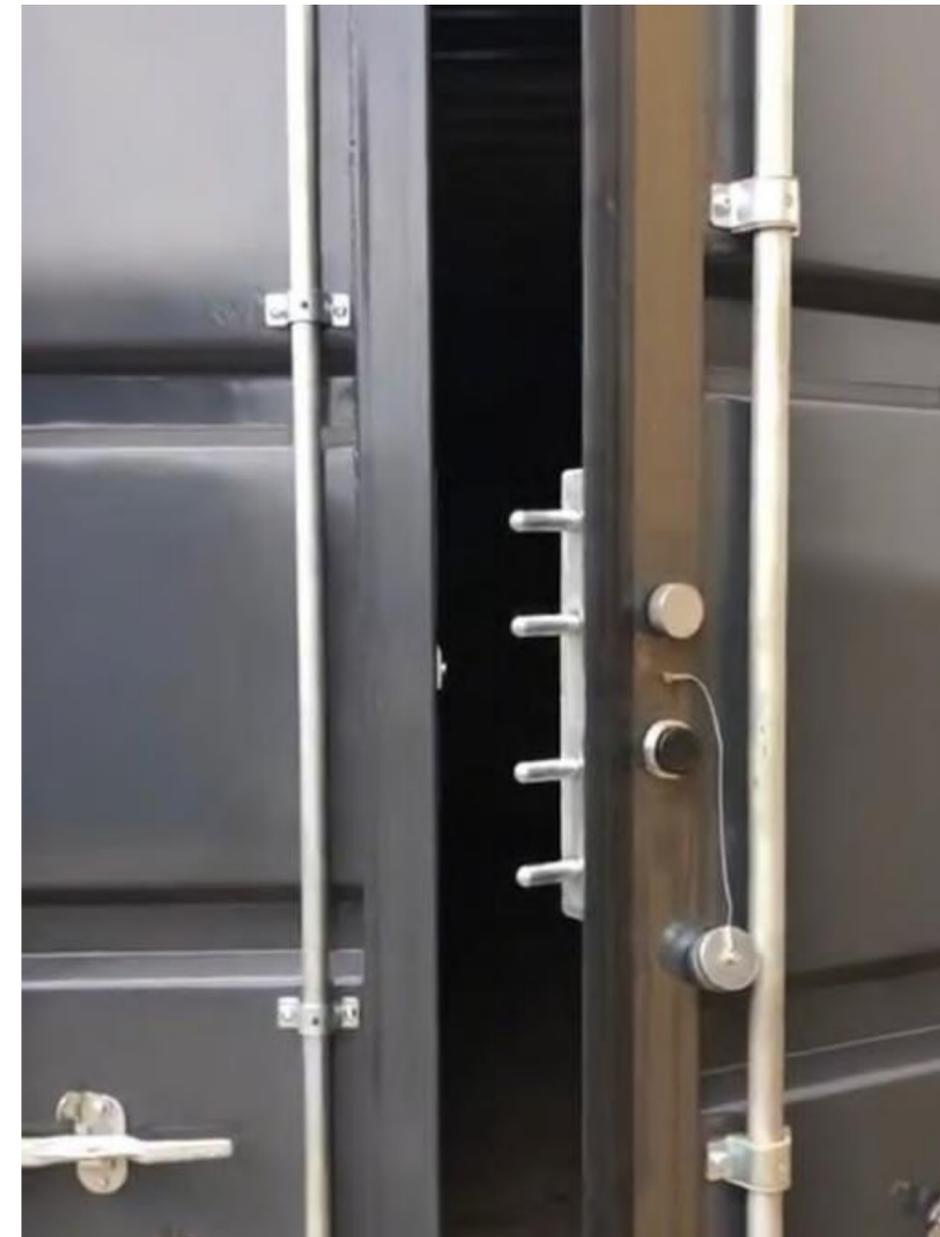

Locking both doors from the inside.
Invisible to external attacks

Designed for easy self installation

Available in 3 versions:
4 Bolt Centre locking;
Remote top locking;
Double Door Slam locking

PADLOCKS

Heavy duty keyless padlocks. Traditional locking methods with a modern approach. From conventional locks to smart locking solutions.

Keyless padlocks:
unpickable padlocks

Keyless NFC
technology powered
by iLOQ

Highly resistant and
heavy duty design

24/7 audit trail

Available with
various shackle
thicknesses:
8mm, 11mm, 15mm

Available with
various shackle
lengths.

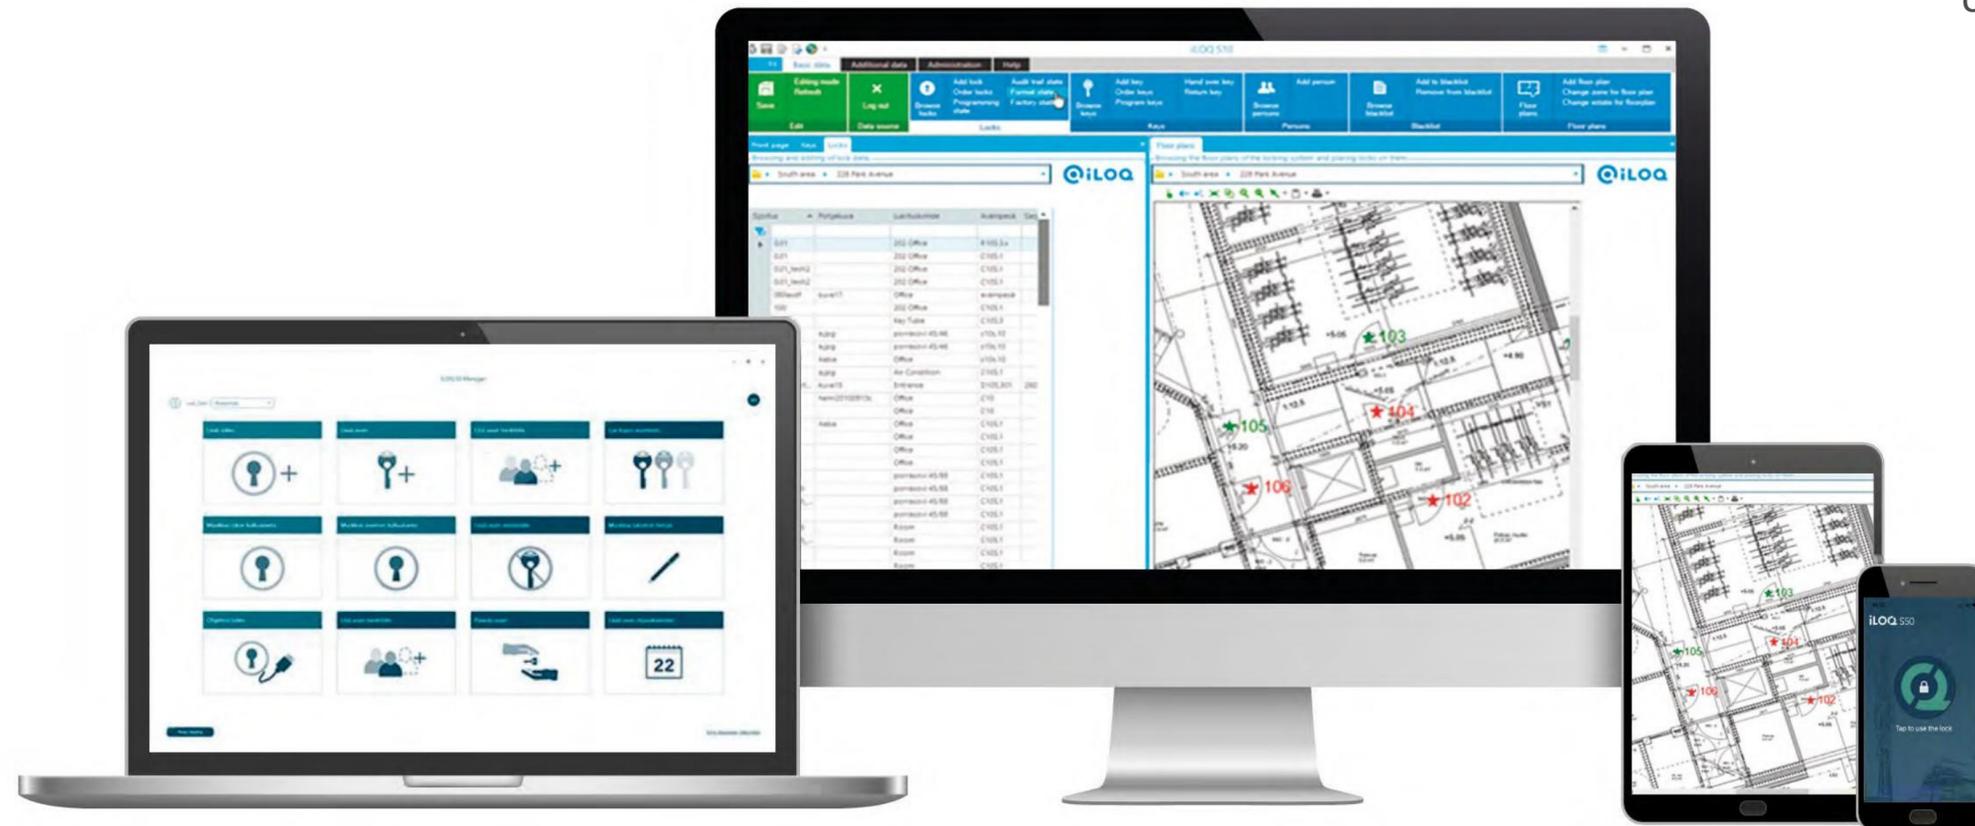

iLOQ NFC TECHNOLOGY – POWERING SEGURATAINER SOLUTIONS

Secure online platform to manage locks, access rights and 24/7 audit trail reports.
NFC: keyless and battery free locks.

- > Free App available on Android and iOS, user friendly software
- > Add or deny access rights in seconds
- > Set user limits on predefined times
- > Convenient over-the-air lock management
- > NFC (Near Field Communication) limits communication to less than 20mm. No unintentional openings.

KEEPING YOUR CARGO SAFE

SUPPLY CHAIN SECURITY
