Burundi 20.06.2023

Hi Bo , some information what you need from your mail from 20.06.2023 , and hope this will be o.k

My Name is Hans-Dieter Burfeind CEO Dredging Mining Service based now in Burundi Kabondo East Afrika

I life now since 10/2022 permanent in Burundi and stopt my Company in Germany , now i do all my jobs worldwide from Burundi , i bought a house closed tot he Tanganjika lake , my businee ist o inspect the Hydraulic and Electronik system fort he Mining Equipment (Excavator and Trucks) and even also for Dredging Equipment .

I left Germany fort he reason thats the tax and all other items insurance Elecricity , waetr Öl ,Gas ,Food going higher and higher , the inlation rate are going more and more up , from this i moved to Burundi ,because my wife is from this country and the whole lifestyle is much more easier then in Europe ,

i live direkt on the Tanganjika lake and closed tot he harbour Bujumbura ,Burundi has only this harbour , Burundi dont has bevor any passenger transport , only goods cement ,stones , flour and some other items , and some container , up to now there is an

Burundian Inveator the build a new ship what can carrier also passenger ND Cargo goods , ist he first ship from a Burundian owner

the new president since 2020 try to stop little bit the corruption , even to get a better economic and the try to get more investors to come in this country , we hope thats the economic are going more up thats the BID in the country are going up , the have nice beaches but no any tourists come to Burundi ,bevor was more difficult to enter this country what is now little bit better , problem is sometimes with fuel Petrol and diesel this hast o come all by truck from Tanzania what is even also difficult .

There are some German and Italien guys have production in Burundi what is going verry wellt he have some resorts on the lake for tourists , is verry nice but not so cheap ,and has a high standard .even the Hotels what the have in Bujumbura has a good standard but all oft hem are not so cheap

The shipping to this country are all from Kongo Tanzania and bring the goods , the port himself is well organized ,but not so many activities , but i see the rate are going up since 6 month

The roads are outside Bujumbura to the upper country to Gitege are all not good , the are working since yaers on it but everytime the stop because no money and no Material , the Mining section now is closed since 8 month because from the corruption the gouverment dont get enough money now this Minister in charge left the position and left the country ,or better he hast o left , now the Gouverment will give new contracts with the Mining companys , one oft the gold mine is used from a russian company and there ist the same problem this is under controll in Russia from Mr. Prigoschin .

I can see thats the economic are going little bit up step by step ,but this will takes a long time

Bo any assistance what you need i will give you even the readers need something the can contact me
